Critical Systems, Global Solutions

About Us

Established in 1999, Atlantic CommTech Corporation (ACT-Corp) is a Woman-Owned Business providing a wide range of technical services to the U.S. Government (and prime contractors) with its corporate headquarters in Norfolk, VA and a branch office in Ramstein, Germany. The company was founded on the principle to commit and perform with successful growth, and we've been doing that for more than 19 years. The leadership team offers an average of over 25 years of experience related to the telecommunications, IT and security industries. Our leaders have served in the US Navy, the US Coast Guard and the US Air Force, and they possess a deep understanding of the US Government environment. ACT-Corp has the ability to provide agile and responsive services in today's fiscally challenged climate.

VISION

Our vision is to deliver superior value for
our customers and shareholders through
effective organizational management,
responsible corporate governance and
continuous improvement, enhancing our
reputation as an Industry-leading
Technology Product and Engineering
Services Small Business.

ABOUT US:

Bevilacqua Research Corporation (BRC) is a Service Disabled Veteran Owned Small Business (SDVOSB). With its corporate headquarters in Huntsville, Alabama, BRC consists of over 300 professional and skilled employees at key locations in fifteen states. Started in 1992, BRC has established a solid reputation as a quality provider of innovative high-technology solutions for the Department of Defense and NASA. BRC is organized into two major business units. The services unit provides advisory and assistance services (A&AS) to the Army, Air Force and Navy. Major programs under this business unit include the OSD Joint Test and Evaluation (JT&E) program, the TMAIS Platforms and C4ISR programs at Eglin and Edwards Air Force Bases, the Combined Tactical Training Range Program for the Navy supporting several of the training ranges, ROSS II propulsion testing for the Air Force Research Laboratory, and testing in the Gulf of Mexico for the Navy at NSWC Panama City. Also in Huntsville we are a major subcontractor to Jacobs Engineering on the ESSCA engineering contract for the Marshall Space Flight Center. Within the technology business unit BRC operates the Human and Machine Learning Laboratory and the CYBER laboratory. These laboratories develop and test advanced cognitive, machine learning and CYBER technologies that provide innovative solutions for DOD customers and programs. BRC maintains a Top Secret Facilities Clearance.

BlueWater Federal Solutions is a customer-centric mission focused company possessing over a decade of experience developing, deploying, and sustaining enterprise IT and applications for DoD and Federal clients. Our success is directly attributed to our program personnel and corporate staff committed to improving our operating capabilities and service delivery. We execute using a strong partnering approach proven to deliver consistent, high-quality services that result in exceptional CPARS ratings and comments from our customers.

Why BlueWater. Over the past 24 months, we have transitioned over 300 Secret and TS/SCI personnel in support of the Nation's defense in CONUS and OCONUS locations. The diversity of our technical experience and capabilities enable us to perform on major program implementations such as Army Aviation Center of Excellence, Defense Healthcare Agency Enterprise Web, DHS National Cybersecurity Center, DISA DISN Consolidated Provisioning, Hanscom AFB Enterprise Communications, Fleet Forces Marine Operations Center, TRADOC Evolutionary Capability Development, NAVSEA and USCENTCOM CCJ3.

We provide Hanscom AFB full-scale communications support including helpdesk and desktop support for 5600 users; network operations of over 400 routers and switches, datacenter operations for 100 Windows/Unix servers, Unified Communications, Web/Portal development, DBA support, and cybersecurity support for RMF and IAVM.

We provide DHA with enterprise web and software development for Health.mil, TRICARE.mil, and line of business systems to the DoD, MHS, VA, and 9.5 million beneficiaries. We implement Agile Scrum using our appraised CMMI Level 3 processes, and execute projects to create a unified information management platform.

We provide USCENTCOM support for Information Management, Multi-National Information Systems, Joint Operations Center, JADOCS and GCCS-J, Common Operational Picture Fusion Center, Theater Air & Missile Defense, and Coalition C2 Interoperability.

One Acquisition Solution for Integrated Services

ABOUT US:

Caelum Research Corporation, an award-winning, woman-owned small business (WOSB), headquartered in Rockville, MD, was founded in 1987. Since then, we have excelled in our core competencies of information technology, systems engineering and program management, logistics, cyber security/information assurance and data/information management. Through our certified procedures, we effectively standardize and streamline performance, operation and management processes. We provide trained and highly qualified technical and managerial personnel in supporting various US Government agencies and commercial clients. Caelum has been recognized over the years by many awards and certifications for excellent contract performance, technical achievement, corporate success, and organizational quality managements. Currently, Caelum supports our clients at multiple locations over the Continental U.S. (CONUS) and overseas (OCONUS).

Our Values include Integrity, Teamwork, Innovation, and Quality. Our Business Strategy is to understand our client's mission, focus on our client's needs to maximize customer satisfaction, provide cost effective solutions, and to establish a reputation as a reliable provider of quality services.

OASIS Small Business Contracts

OASIS Small Business, Pools 1 & 3
GS00Q14OADS112 (Pool 1)
GS00Q14OADS315 (Pool 3)

As the top performer under OASIS Small Business (SB) Pools 1 and 3 and as the recipient of more than 30 prime tasks under OASIS (as of Jan. 2018), Credence is your ideal contractor for OASIS SB. Our differentiators include our broad portfolio of prime contract work across all OASIS domain areas; our robust infrastructure to support large-scale, complex assignments for Federal customers; our flat structure to allow for rapid, agile responses; and our exceptional CPARS evaluations.

Credence is the leader amongst small businesses in providing innovative management, technology, and engineering solutions to Federal government clients—delivering results quickly and cost effectively. Credence has successfully supported U.S. government customers since 2005, with 95 percent of our work being performed as a prime contractor and with exceptional references.

CSSI, Inc. partners with government and commercial clients to ensure transportation systems are designed and equipped to safely and efficiently move people and materials. Leveraging deep roots in aviation, CSSI, Inc. pioneers analytics and best practices that enhance productivity, decrease costs and Improve safety.

CLIENT BASE:

- Federal Aviation Administration
- Department of Defense
- Commercial

CERTIFIED PROFESSIONALS:

- Certified Professional Engineers
- Model Based System Engineers
- Project Management Professionals (PMP)
- Certified Information Systems Security Professionals
- Lean Six Sigma

CAPABILITIES:

Systems Engineering

- Enterprise Architecture
- Lifecycle Systems Engineering
- Safety Engineering and Risk Analysis
- Human System Integration
- Portfolio Management
- Financial Management/Budget Analysis

Operations Research

- Decision Support Systems
- Safety Management
- Operations & Cost-Benefit Analysis

Safety and Environmental Services

- Safety Management Systems
- Voluntary Safety Reporting
- Fatigue Risk Management
- Air Quality Tools
- Emissions Inventories
- Airspace Redesign Services

Applied Research and Development

- Development & Analysis of Concepts of Operations
- Advanced Concepts & System integration
- Advanced Model Application

Modeling and Simulation

- Environmental Models
- Systems-Level Simulations
- Fundamental Models

Information Technology Solutions

- Full Software Development Lifecycle Support
- Enterprise Web Solutions/Portals
- Network Engineering
- Analytical Business Apps Information Assurance

FedRAMP

Dakota is an International Organization for Standardization (ISO) registered company under the ISO 9001:2015 standard for quality management systems, and has a Maturity Level 2 rating under the Capability Maturity Model Integration Development Constellation (CMMI-DEV v1.3). Dakota is also accredited by a registrar (the American Association for Laboratory Accreditation [A2LA]) under the ISO 17020:2012 standard for inspection bodies (a Federal Risk and Authorization Management Program [FedRAMP] requirement).

Dakota has also developed our “Flow-to-Grow (F2G)” methodology, our proprietary system for process management.

Dakota Consulting, Inc.

Dakota Consulting was founded in 2004 to deliver high caliber, cost effective, and flexible technical solutions to federal agencies. Today, Dakota is a fast-growing small business delivering industry-recognized expertise in information technology, program management office support, cybersecurity; and scientific, engineering, and professional services support to a wide range of federal civilian and Department of Defense organizations. This support includes work with commercial-off-the-shelf, proprietary, and open-source products; cybersecurity assessments, continuous monitoring, and independent services; and numerous scientific and technical areas, including biology, chemistry, engineering, computer science, mathematics, measurement science, nuclear physics, and physics. Over 95 percent of this support has been as a prime contractor. We are a stable, resourceful, and experienced firm with consistent growth every year. We employ over 150 staff with a range of competencies and credentials, allowing us to successfully perform on a diverse portfolio of projects.

CLIENT BASE:

- Department of Commerce – NIST
- US Air Force
- Department of Defense – USTRANSOM
- Department of State
- Department of Homeland Security
- Environmental Protection Agency
- National Science Foundation
- Numerous other federal agencies and commercial clients

CONTRACT INFORMATION:

OASIS SB Pool 1 – GS00Q14OADS113 (8(a), WOSB)

CORE CAPABILITIES:

- Management and IT Services
PMO, mission support services, business process engineering, etc.
- Software Engineering
DME, DevOps, data analytics and database services
- Cybersecurity
A&A, continuous monitoring, independent security services, FISMA
- Scientific Research and Technical Services
Standards support and development, measurement science, scientific research, health IT and biometric algorithms

About Us

DDL OMNI Engineering LLC is a privately held company that was founded in 1959 as a technical services division of Data-Design Laboratories, Inc.; later merged with Hydrotronics, Inc., then reorganized as DDL OMNI Engineering Corp. In June 1990, James Schaeffer purchased and grew the Company with strategic acquisitions over several years. DDL OMNI is an ISO 9001:2015 registered engineering and technical services company. We bring nearly 50 years of experience supporting the Government. There are approximately 250 Employees at Multiple Locations: McLean, VA (HQ); Virginia Beach; Baltimore; Washington, DC Navy Yard area; Norwich, CT; Newport, RI; San Diego; and Pearl Harbor. DDL OMNI offers clients a wide variety of contracting vehicles: NAVSEA SeaPort-e, EAGLE II, OASIS SB Pool 3, GSA schedules & GWACs.

Clients

- USCG HQ (CG459) & Surface Force Logistics Ctr Eng Svcs Div (SFLC ESD)
- NUWC
- NAVSEA
- NAVAIR PMA-264
- Commander 2nd & 3rd Fleet
- Tactical Training Group Pacific (TTGP)

About Us

DRT Strategies, Inc. (DRT – Driving Resolution Together) is one of America's leading technology & strategy companies differentiated by its high-performance culture and solutions that make a difference in how Government performs.

DRT, founded in 2004, is an award winning small business that knows how to manage major financial management and systems engineering programs that support complex federal agencies and enterprise clients. The company has a Top Secret facility clearance. DRT is headquartered in Arlington, Virginia, with offices in Washington, D.C., Atlanta, Georgia, Baltimore, Maryland, Orlando, Florida, and Kansas City, Missouri.

CORPORATE OVERVIEW

ERT is a trusted partner to the government, providing scientific analysis and modeling, engineering, information technology, and environmental services and solutions to NOAA, NASA, DoD, USGS, the Army Corps of Engineers, and other Federal and state government agencies.

ERT AT A GLANCE

- Woman-owned small business (WOSB)
- DCAA-approved accounting system
- ISO 9001:2015 certification
- CMMI Maturity Level 3 rating
- Award-winning company earning recognition from NASA, NOAA, and industry
- Core services:
 - Science and technology support
 - Engineering support
 - IT solutions/services
 - Environmental services

Optimize algorithms for studying long term trends in ocean temperature.

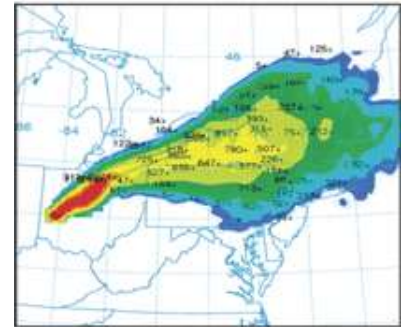

CAPABILITIES

ERT has research and development (R&D) experience covering the breadth of our core services from science and technology, to engineering and environmental services.

Modeling and Data Analysis

Our modeling capabilities span from data assimilation for model inputs to model development and analysis. Our modeling expertise is applied to various research efforts from climate change, to contaminant impacts, to natural disaster impact analysis. Capabilities include:

- High performance computing integration, testing, and evaluation of numerical prediction models and data assimilation approaches.
- Development and testing of data assimilation quality control and data preparation approaches.
- Geoid modeling calibration performing extensive fieldwork via laser ranging and gravimeters for in-situ observations to validate calculated or satellite-inferred calibrations.
- Dispersion modeling and modeling development for air quality (ozone, particulates, carbon, NO_x), contaminant (oil plume, algal blooms, cyanobacteria), ocean sensor data (temperature, ph, sea level) observations, forecasts and predictions.
- Model analysis to predict environmental and human impacts and plan targeted and timely response strategies.

Atmospheric contaminant dispersion modeling.

Remote Sensing, Algorithm Development, and Instrument Calibration & Validation

Our capabilities include remote sensing and algorithm development with the goal of enhancing ongoing data collection and research of various ecosystem processes.

- Create land, ocean, and atmospheric products through the use of algorithms and radiative transfer models. Examples include atmospheric aerosol content, ocean chlorophyll measurement, and vegetation net primary productivity.
- Develop algorithms to remove atmospheric effects from a variety of remote sensing instruments such as Landsat, MODIS, and SeaWiFs.
- Acquire and process hyperspectral data through development of algorithms.
 - In-situ and airborne/satellite study sites provide data from locations worldwide.
 - Data promotes understanding, monitoring, and modeling a wide variety of terrestrial ecosystem processes and plant physiology.
- Develop new 30-m measurements of reflectivity of the Earth's surface (albedo) to provide

enhanced ground texture and wider dynamic albedo range. More detailed albedo can be used to study the evolution of forest disturbance.

- Integrate data from multiple remote sensing instruments internationally to enhance temporal coverage frequency for crop monitoring and disaster monitoring.
- Develop satellite instrument pre- and post-launch algorithms for both geostationary operational & polar-orbital environmental satellites to perform ultraviolet, visible, infrared, and microwave wavelength calibrations.
 - Conduct long-term monitoring and trending of instrument performance.
 - Characterize instrument biases with respect to other operational sensors and simulations.

Research, Development, Test and Evaluation (RDT &E)

Our capabilities include analysis of research RDT&E efforts. Capabilities include:

- Tracking and evaluating current and ongoing R&D in specified mission areas.
- Informing numerous stakeholders of the latest developed technologies.
- Effectively reducing interagency redundancy in R&D efforts.

ERT is an awardee on GSA's OASIS Small Business Pool 4 for Research and Development. For more information, contact:

ABOUT US:

Ecomplex, Inc. provides customers with full range professional services as well as information and cyber security technology and services. Ecomplex has developed true Artificial Intelligence (AI) technologies for performance, efficiency, and accuracy of information extraction, information security, surveillance, information governance, and automated processing to replace traditional paperwork. This ensures that you will receive exactly the intelligence, data visualization and analysis, and data collection in your big data and data mining operations. We support digital transformation for digital government. Ecomplex is certified with ISO 9001 and CMMI, providing a full range of professional services for Government. As a leader in the information management industry for 16 years, Ecomplex, Inc. has provided enterprise wide systems, strategies, and solutions to major Government and Industrial organizations.

CUSTOMER SATISFACTION ORIENTED STAFF:

- 16+ years Federal and local services
- 3 Operation Sites Reston, VA, Lenexa, KS, San Antonio, TX
- Nationwide mobile operations
- 60,000,000 documents digitized and processed
- 150+ personnel managed for single contract
- 100% of staff puts customer satisfaction as priority #1
- 100% of PMs have PMP certification
- 100% of supervisors have professional certificates or training
- 100% possess security background checks

Engineering Research and Consulting, Inc. (ERC) provides engineering, scientific, technical, and administrative services to Department of Defense (DoD) and NASA customers across the United States. ERC was founded in 1988 by Dr. Susan Wu, who in 1964 became the first woman to receive a PhD in Aeronautics from Caltech.

ERC is headquartered in Huntsville, AL. We were awarded an **OASIS SB contract under Pool 6**.

We have experience across all six OASIS Core Disciplines:

- ✓ Program Management
- ✓ Management Consulting
- ✓ Scientific
- ✓ Engineering
- ✓ Logistics
- ✓ Financial Management

ERC is ISO

FORS MARSH GROUP, LLC (FMG) is a research and consulting company specializing in measuring, understanding, and influencing the way people think and make decisions. Since our founding in 2002, we have successfully completed hundreds of large-scale and highly visible research projects. We have developed multi-million dollar strategic communication agendas (incorporating qualitative and quantitative research components), designed and developed training efforts for federal employees, administered surveys to more than 450,000 participants, and created communication plans and outreach products for various causes. We help clients evaluate, reinforce, and change their target audiences' behavior to positively impact their day-to-day lives. Our team is made up of individuals with extensive training in communication, psychology, economics, statistics, public policy, computer science, and human factors.

Enabling our customers' success is the foundation of KIHOMAC's core mission and path to continued growth

KI HO MILITARY ACQUISITION CONSULTING

ABOUT US

KIHOMAC has over 14 years of corporate experience providing professional acquisition, sustainment, modernization engineering, and manufacturing services to the United States Air Force (USAF) and other Department of Defense (DoD) Services and agencies. Our highly skilled team of professionals support all three Air Logistics Complexes (ALCs), including the C-5 program and Diminishing Manufacturing Sources and Material Shortages (DMSMS), A-10, F-16, Intercontinental Ballistic Missile (ICBM), Munitions Handling Unit (MHU), and other Supply Chain and Air Force Sustainment programs. We have proven performance on over 235 prime DoD contracts and task orders, and have managed over 85 subcontractors and vendors. KIHOMAC provides our clients with dedicated, timely, responsive, and affordable solutions to their challenging and complex problems. Since our inception in 2003, KIHOMAC has established an outstanding track record of meeting the performance needs of our US Government customers.
